

LED Exit w/Battery Backup Red Letters 120/277V

LTEL002R

Properties

Electrical

- MOUNTING: SNAP IN canopy kit for side top or end mounting, 2 faces and backplate
- COOL RUNNING LED: State of the art light source, which provides energy efficient, long life and even legend illumination.
- POWER REQUIREMENTS: Dual voltage, input 120/277Vac, 60Hz
- CIRCUITRY: Fully integrated circuitry includes a 2-wire 120-277Vac AC voltage input regulator, as well as an automatic, constant-current battery charger with solid-state transfer and AC-LED monitor and test switch

Self Powered Units

- Units come with a test switch and AC on indicator
- Maintenance free nickel cadmium Battery (4.8V/700mAh)
- Charger driver assembly offers advanced features such as temperature compensation and superior LED performance.
- High efficiency current regulated circuitry maintains equal illumination level in both the emergency and AC modes.
